DETAILED ACTION

Specification

1. The title is objected to because of the following informalities:
 - the title on the application does not match the title of the patent application filed.

Please make the appropriate correction.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2, 4-5, 7-9, 11-12, 15-17 and 19-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Landsman et al. (US006516338B1).

3. With regard to *claims 1, 8, 11-12, 16 and 20-21*, Landsman reference discloses,
 - *coupling the server system to a network, the network being configured to be coupled to distributed devices (column 15, lines 48-61).*

- *storing data representing a plurality of attributes for a plurality of the distributed devices* (column 21, lines 8-20).
 - *utilizing at least one of the plurality of attributes to identify a subset of the plurality of distributed devices* (column 21, lines 8-20).
4. With regard to *claims 2, 9, 15 and 17*, Landsman reference discloses,
- *further comprising distributing an advertisement to the identified subset of distributed devices* (column 21, lines 8-20).
5. With regard to *claims 4-5, 7 and 19*, Landsman reference discloses,
- *wherein the plurality of attributes comprise device capability information for the distributed devices* (sheet 7, figure 3).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
- Claims 3, 6, 10, 13-14, 18 and 22-23* are rejected under 35 U.S.C. 103(a) as being unpatentable over Landsman et al. (US006516338B1) and further in view of Bull et al. (US006208975B1).
7. With regard to *claims 3, 6, 10, 13-14, 18 and 22-23*, Landsman reference discloses,

- *coupling the server system to a network, the network being configured to be coupled to distributed devices (column 15, lines 48-61).*
- *storing data representing a plurality of attributes for a plurality of the distributed devices (column 21, lines 8-20).*
- *utilizing at least one of the plurality of attributes to identify a subset of the plurality of distributed devices (column 21, lines 8-20).*

However, Landsman reference does not explicitly disclose,

- *further comprising distributing a project workload to the identified subset of distributed devices.*

Bull teaches,

- *further comprising distributing a project workload to the identified subset of distributed devices (columns 14-15, lines 54-2).*

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to combine Bull reference with Landsman reference to facilitate the user's online task by anticipating his/her needs from the collected profile information and thus enhance the user's experience at the particular website.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Lazarus et al. (US006134532A)

- Land et al. (US006505246B1)
- Davis et al. (US006138155A)
